Cathedral of Immaculate Conception

(Harbour Grace)

The story of the existing Cathedral of Immaculate Conception begins with the establishment of the Diocese of Harbour Grace and the construction of an earlier cathedral. Bishop John Dalton became the first bishop in the new diocese on June 1, 1856, and among his first priorities was the construction of a cathedral. Dalton enlisted the assistance of Rev. Father Henry Carfagnini, a man known for his architectural design talents. The initial Cathedral of Immaculate Conception was modelled on St. Peter's in Rome. Work on the cathedral was far from complete when Bishop Dalton died on May 5, 1869. His remains are interred under the main altar of the present cathedral.

© 1998 Heritage Foundation of Newfoundland and Labrador
[Larger Version](#) (24Kb)

Carfagnini replaced Dalton as the new Bishop of the Diocese of Harbour Grace and continued work on the church. The cathedral was still not completed when Carfagnini left Harbour Grace in 1880 to accept a position in Italy. His

replacement, Bishop Ronald MacDonald, supervised the completion and consecration of the first Cathedral in 1885. The final structure had an estimated value of \$350,000. Unfortunately, the parish had failed to insure the church, and it was destroyed by fire on the September 2, 1889.

Led by the efforts of local priest J. M. O'Brien, construction of the second Cathedral of Immaculate Conception began almost immediately. O'Brien was the first Grand Knight of the Knights of Columbus in Harbour Grace when the John Dalton Council was established on November 29, 1909. The Dalton Council Knights of Columbus worked with other members of the congregation to quickly rebuild the church.

The rubble-wall cathedral was built in a Gothic style with lancet windows and two tower spires on either side of the main entrance. The interior has high-vaulted plaster ceilings through

the nave, transepts and chancel. The work was completed and the parish held a consecration service in 1892.

The cathedral served as the seat of the Diocese of Harbour Grace until 1965. The Diocese included all of the parishes and missions in Conception Bay, along the Northeast coast, and in Labrador. In 1984, the Immaculate Conception Parish celebrated its 200th anniversary and in 1992 commemorated the 100th anniversary of the existing building.

Years of wind and weather took their toll on the exterior masonry. Restoration work continues on the Cathedral's exterior stone to return it to its original condition. The twin spires were removed from the building to make their restoration easier.

The Heritage Foundation of Newfoundland and Labrador declared the Cathedral of Immaculate Conception in Harbour Grace a Registered Heritage Structure in April 1990.
